Bringing the Power of Telematics to Fleet

TeMeDa is specifically designed to help companies promote safety, and reduce cost while increasing the utilization and productivity of your fleet

Increase Productivity

TeMeDa offers fleet owners and operators unmatched visibility into their operations. Keep your fleet operating at maximum efficiency by having access to detailed information including location, speed idling and time at sites.

Reduce Operating Cost

With accurate mileage and usage reporting you will know exactly how much time is spent doing a job and how productive your fleet and staff really are. Comprehensive reports will allow you to reduce idle time and fuel usage as well as wear and tear on your vehicles.

IFTA Fuel Tax Reporting

TeMeDa has partnered with Pro Miles, one of the industry's most widely used fuel tax reporting companies, to offer a comprehensive IFTA compliance tool. Integrating Pro Miles with TeMeDa means that the system automatically updates odometer readings and determines state line crossings allowing the application to create required IFTA and Mile Tax Reports

Cold Chain Monitoring & Compliance

TeMeDa offers a complete temperature monitoring solution that provides real-time monitoring, alerting and recording of transport container temperatures in compliance with the Food Safety Modernization Act (FSMA) mandate.

ELD / AOBRD Compliance

TeMeDa offers a fully compliant ELD application to track and report Hours of Service (HOS) integrated with the TeMeDa Application.

Driver Safety

Reduce cost and improve safety with real time driver safety alerts and comprehensive fleet safety performance reporting. Acknowledge your safe drivers and coach improvement where appropriate.

Fleet Maintenance

Remotely monitor odometer, time between maintenance intervals and diagnostic trouble codes. Create custom maintenance schedules, track actual maintenance and cost. Generate alerts for your own service department or local dealer. Improve the accuracy of your PM program to reduce costs and minimize downtime.

Current Location, Unauthorized Usage, Theft Recovery

Always know where your assets are located so that you can better plan where they need to be. Utilize real time alert notifications that an asset is moving or is operating off hours. Utilizing GPS you can track and recover an asset in case of theft.
